Event Description:

Electrical & Electronics Engineering Department has organized a One day workshop on “Introduction of Patents and its uses for research Scholars and Students” on 12th July, 2017. The program is started with welcome note by the Principal followed by the lecture session. During this

workshop the following points were discussed about Introduction about Patents, Types of Patents, Uses and applications of Patents, Understanding the various Patents and if else rules. The objectives of the program are: Be coherent and balanced: 1) Offering a fair level of protection to inventors/applicants from all backgrounds. 2) Providing a fair balance between the rights of inventors/applicants and third parties. Provide legal certainty to inventors/applicants and third parties alike. Promote high quality patents by ensuring that patent protection is provided only to inventions that are new, involve an inventive step and are capable of industrial application.

Event Description:

In today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance. IP has gained center stage and has attained more focus, more attention and is a subject matter of discussion between government, institutions, industries under various regimes and protocol that are put in place to ensure that the world in which we live, where knowledge and innovation are the engines of development and growth. In that world, those who have the creative minds and ability should feel assured that not only their efforts have been duly recognized but it is secured in a specified manner.

Event Description:

Motivation is valuable because it helps the students to understand: where they are and to change their way of thinking, what increases and decreases in life, what aspects of it can and cannot be changed, and help them to answer the question of what is more beneficial in career. Motivation reflects something unique about each one of us and allows us to gain valued outcomes like improved performance, enhanced wellbeing, personal growth, or a sense of purpose. Motivation is a pathway to change our way of thinking, feeling, and behaving.

Event Description:

A citation is the text reference and acknowledgement of documented information. A scientifically written article comprises a reference section at the end where all the references mentioned in the document are cited serially, and each reference is a citation. A citation count is the frequency of an article cited by other articles. A citation index is a kind of bibliographic database, an index of citations between publications, allowing the user to easily establish which later documents cite which earlier documents. Citation indexing consists of the charting of the text details of each such reference. Citations are used as a measure of importance of the information source and enables users to gather data on the "impact" of journals as well as assessing and analyzing particular areas of research activity and publication.

Event Description:

This workshop program is designed as per market survey to provide the technologically advanced concepts along with basics to aptly fit in the hectic semester schedule and at the nominal cost as well. The objectives of the workshop are: To Understand the practical working scenario of Mobile networks like 2G, 3G and 4G and Optical Fiber communication. To understand the scope of engineers in the Telecom and IT Industry. To have a practical exposure of Live Tools working for Planning of Optical and Mobile network for Coverage and Capacity. Test of the live network performance with tools to understand the key issues in the network. To do hand-On on Splicing Machine for optical fiber communication joint. To use GPS and Magnetics Compass for locating a particular site and its direction.

"DIGITAL SIGNAL PROCESSING
BY USING MAT LAB"

Digital Signal Processing

From
4th to 9th October, 2017
Time: 9:30 AM to 4:10 PM
Venue: C&S Lab
SCIENT INSTITUTE OF TECHNOLOGY
 AICTE Approved, INTU Affiliated, Estd: 2001

Event Description:

The importance of mathematics in the study of problems arising from the real world, and the increasing success with which it has been used to model situations ranging from the purely deterministic to the stochastic, in all areas of today's Physical Sciences and Engineering, is well established. The progress in applicable mathematics has been brought about by the extension and development of many important analytical approaches and techniques, in areas both old and new, frequently aided by the use of computers without which the solution of realistic problems in modern Physical Sciences and Engineering would otherwise have been impossible. The purpose of the series is to make available authoritative, up to date, and self-contained accounts of some of the most important and useful of these analytical approaches and techniques. Each volume in the series will provide a detailed introduction to a specific subject area of current importance, and then will go beyond this by reviewing recent contributions, thereby serving as a valuable reference source.

Event Description:

Electrical & Electronics Engineering Department has organized a One day National Level workshop on MATLAB Coding for Technical Students on 24th February,2018 by Mr. Kasi Ramakrishna Reddy has given the overview of MATLAB Coding. The program is started with welcome note by the Principal Dr. B. Sridhar Reddy followed by the lecture session. During this workshop the following points were discussed: Introduction MATLAB coding, Understanding the various loops and if else rules. The objectives of the program are: to create awareness on MATLAB coding for technical students of the simulation lab, to encourage the faculty to use MATLAB.
