## BRAILLE SOFTWARE

### Name of Software: Braille Blaster

Braille Blaster is a well-known open-source Braille translator, for translating text and mathematics to Braille.

Braille Blaster takes advantage of the rich markup contained in NIMAS (National Instructional Materials Accessibility Standard) files to automate basic formatting and gives you tools to make advanced tasks quicker and easier. Designed primarily for editing textbooks that meet the specifications published by the Braille Authority of North America, the purpose of Braille Blaster is to help Braille producers ensure that every student has their Braille textbooks on the first day of class.
